			DATE MAILED: 11/19/2003	

Please find below and/or attached an Office communication concerning this application or proceeding.

## Applicant(s) Application N . **BOGAERT ET AL.** 09/777.510 Advisory Action Examiner **Art Unit** 3764 Danton DeMille --The MAILING DATE of this communication appears on the cover sheet with the correspondence address --THE REPLY FILED 06 November 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. PERIOD FOR REPLY [check either a) or b)] The period for reply expires \_\_months from the mailing date of the final rejection. The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1. A Notice of Appeal was filed on <u>06 November 2003</u>. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal. 2. The proposed amendment(s) will not be entered because: (a) they raise new issues that would require further consideration and/or search (see NOTE below); (b) they raise the issue of new matter (see Note below); (c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or (d) \_\_\_ they present additional claims without canceling a corresponding number of finally rejected claims. NOTE: . 3. Applicant's reply has overcome the following rejection(s): \_\_\_ 4. Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s). 5. ☑ The a) ☐ affidavit, b) ☐ exhibit, or c) ☑ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet. 6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection. 7. For purposes of Appeal, the proposed amendment(s) a) will not be entered or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: 21-23,35-47 and 51-54. Claim(s) objected to: \_\_\_\_\_. Claim(s) rejected: 1-19,25-34 and 48-50. Claim(s) withdrawn from consideration: 8. The drawing correction filed on \_\_\_\_ is a) approved or b) disapproved by the Examiner. 9. Note the attached Information Disclosure Statement(s)( PTO-1449) Paper No(s).

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03)

10. Other: \_\_\_\_

Daffton DeMille Primary Examiner Art Unit: 3764 Continuation of 5. does NOT place the application in condition for allowance because: Applicant argues that the instant invention provides more anatomical fit in the posterior chamber of the eye however, there doesn't appear to be anything claimed that would define over the prior art. If applicant is relying on the continuous posterior surface free from discontinuities this is taught by Wanders to have a continuous curve free from discontinuities to prevent points of inflection. The added benefit of having a more anatomical fit would also be true in Wanders. Providing a flawless curve would be true for the anterior and posterior surface for the same reasons. Wanders teaches the advantages of having a curve free from discontinuities and such would have been obvious in Feingold in either the anterior or posterior surface. Feingold has discontinuities in the lens as shown in figure 17. Wanders teaches how to get rid of them. The examiner is not modifying Feingold for a better anatomical fit. The examiner is modifying Feingold to provide a surface free from discontinuities as claimed and as suggested by the prior art.
